1. The amendment filed Sept. 6, 2005 has been entered.
2. Applicant's election without traverse of the invention of Group 1, claims 1-18 in the reply filed on Sept. 6, 2005 is acknowledged.
3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Miller US 3,618,374 discloses a device for measuring surface energy.
4. Claims 1-18 have been allowed.
5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

This application is in condition for allowance except for the presence of claims 19-32 drawn to an invention non-elected without traverse. Accordingly, claims 19-32 have been cancelled.

6. The following is an examiner's statement of reasons for allowance: None of the prior art of record showed or would have made obvious a probe for computing a relative surface energy of a test surface with a sampler having a rotating convex tacky surface, a force sensor, a rotation sensor, a controller and other elements structured and interacting as in claim 1. Batchelder US 6,697,152; US 6,507,93 and US 6,449,035 do not claim such a probe.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
